

To Whom It May Concern:

This letter is in reference to Roppe products and the use of Lead or Formaldehyde. Roppe does not use any form of Lead or Formaldehyde in the manufacture of its products.

Please call me if you have any further questions on this matter.

Sincerely,

ROPPE CORPORATION

Donald P. Miller President/CEO

To Whom It May Concern:

RE: Roppe Products: OSHA and MSDS

This letter will serve to confirm our conversation regarding the fact that Roppe products do not require a rating from OSHA (Occupational Safety & Hazard Administration), nor do they require a Material Data Safety Sheet (MSDS).

Roppe products do not come under the jurisdiction of OSHA in any way. Nor do they need a Material Data Safety Sheet. Material Safety Data Sheets are required to be filled out on materials which, when used without special precautions and controls, will constitute a health hazard to workers (see enclosed definitions). None of the products we manufacture constitute a hazardous condition.

Please call me if you have any further questions.

Sincerely,

ROPPE CORPORATION

Donald P. Miller
President/CEO
